## Overview

- Senior-level expertise and passion for coding with PHP
- Senior-level expertise and passion for coding with JavaScript

- Knowledge about professional software engineering, e.g. SOLID-principles, Clean Code, Separation of Concerns, Hexagonal architecture
- Working experience with standard frameworks like Symfony, CakePHP and SLIM
- Working experience with API Rest
- Experience with Webpack
- Solid knowledge of accessibility, SEO and UX aspects of front-end development
- Good understanding of cross-browser/platform issues
- Strong experience with a responsive web design approach, e.g MediaQueries, CSS Grid and Flex
- Strong consulting and architectural skills, and ability to work and clarify business requirements
- Strong code-reviewing skills
- Excellent written and verbal skills in the English language
- Experience working with e-commerce built from scratch, with WordPress (WooCommerce), with PHP and Shopify
- Experience working with multiple developers in the same project

## About Me

I consider myself a hardworking person. I am not the kind of professional who leaves for tomorrow the work I could do today. I like working in a team as much as I like working by myself. I like taking on new challenges because they make me grow as a professional. I like studying in the university, but I also like studying on my own, as to me that is the only way to keep up in the world of Informatics.

## Skills:

### Back-end

- PHP
- MySql
- Server management
- Python
- Node

### Front-end

- JavaScript ES6
- HTML 5
- CSS3
- Bootstrap
- TailWind
